

CURRICULUM VITAE (CV)

Junior Systems and Network Administrator with solid hands-on experience in Cisco equipment configuration, Windows Server administration, LAN/VLAN management, and user support. Rigorous, versatile, and motivated, capable of resolving network and system issues in professional environments.

A. PERSONAL INFORMATION

- Name : BUTSEME MULIKI Gloire
- e-mail address: butsemegloire@gmail.com
- LinkedIn : gloire Butseme
- Portfolio : [Gloire Butseme | System and Network Administrator](#)

B. EDUCATION

- Bachelor's degree in Network and Systems Administration, obtained at Don Bosco University of Lubumbashi (UDBL).
- Primary and Secondary Education: CS.LES ELITES /Lubumbashi ; biologie-chimie

C. CERTIFICATE

- Cisco Certified Support Technician (CCST) Networking
 - CCNA 2: Switching, Routing, and Wireless Essentials – Cisco Networking Academy
 - CCNA 3: Enterprise Networking, Security and Automation – Cisco Networking Academy
 - English language training (Intermediate level), certificate obtained from Graffins College (Nairobi /Kenya)
 - Cisco Networking Professional – Certificate of Achievement, Computer Pride Training Centre, (Nairobi/ Kenya).
 - Introduction to Cybersecurity – Cisco Networking Academy
-

D. PROFESSIONAL EXPERIENCE

IT Support / Junior System Administrator – BRALIMA, Lubumbashi
April – Jun 2025

- Level 1 & 2 technical support for users (Windows 10/Server)
 - LAN network troubleshooting (cabling, Cisco switches, IP connectivity)
 - Basic administration of Windows Server 2019
 - Configuration and maintenance of user workstations
 - Hardware and software troubleshooting
 - Compliance with IT procedures and incident documentation
-

E. TECHNICAL SKILLS

Networking :

- TCP/IP, VLAN, Routing, Switching
- Cisco IOS, pfSense, OPNsense
- VPN, Firewall, NAT

Systems :

- Linux: Ubuntu, Kali
- Windows: Windows Server 2016/2019, Windows 10/11
- Active Directory

Automation & DevOps:

- Bash, PowerShell
- Ansible
- Docker (basic level)

Security:

- Firewall configuration(basic level)
-

F. LANGUAGES

- **French : Native**
 - **English : Intermediate level**
-

G. PROJECTS

- Securing the RDP protocol against brute-force attacks – Analysis of security logs, implementation of automatic blocking mechanisms for malicious IPs, configuration of two-factor authentication (2FA) and contextual authentication, and robustness testing to secure remote access.
 - Deployment and administration of a Windows Server infrastructure – Setting up an Active Directory environment with user creation and management, promoting a server to a domain controller, configuring DHCP, DNS and IIS roles, implementing Active Directory replication, configuring network drives and Group Policy Objects (GPOs) to enhance security, and automating administration and deployment tasks using PowerShell.
 - Implementation of a redundant and highly available network infrastructure under GNS3 – Design and simulation of a three-tier network architecture integrating inter-VLAN routing, DHCP replication with failover (Hot Standby), DNS replication to ensure continuous name resolution, and a fault-tolerant infrastructure guaranteeing high availability, service resilience, and the elimination of single points of failure (SPOFs).
-

H. PROFESSIONAL REFERENCES

- Head of Department, Basic Level – Faculty of Computer Science, Université Don Bosco de Lubumbashi Lubumbashi : Michée Kalonda ; +243 993606633 ; michee.kalonda@esisalama.org
